

SELECTOR

Configure and own every aspect of order fulfilment with Bennu Selector.

Route orders in realtime with our rules engine to ensure efficient processing.

- Configure fulfilment options, including setting limits on orders or fulfilment times and handling exceptions.
- Segment fulfilments into categories depending on profiles.
- Implement tools for customer service teams to manage fulfilments on behalf of a customer.
- Empower your teams to check and test fulfilment rules before going live.
- Selector can be combined with other Bennu products or run alongside your existing systems.

KEY FEATURES

- Dedicated management area for fulfilment providers
- Balance multiple providers and configure order volumes
- Search functionality available to control order origins for every fulfilment type
- Create routing rules for specific fulfilment providers
- Use filters to easily identify certain rules
- Configure fulfilment provider priority
- Set pre-determined order and fulfilment limits
