

WORKFLOW

B WORKFLOW

Bennu Workflow streamlines your operations with a fully automated bulk change management tool.

Schedule high-volume updates quickly and efficiently so you can focus on running your business.

- Manage operational changes to thousands of accounts at once, or schedule them to occur at a specific time.
- Enjoy heightened security and fraud protection by forcing identity authentication checks in bulk, such as password or PIN resets and phone verifications.
- Send important account communications and marketing messages to your customer base in one go.
- Maximise your operational efficiency by building bulk tasks exclusive to your business.
- Integrate Workflow into your existing business intelligence tools or combine it with other products in the Bennu ecosystem.

KEY FEATURES

- Bulk enable and disable customer accounts
- Update account statuses and add or change tags
- Issue or adjust loyalty points
- Force password and PIN resets or phone validations
- View task progress in realtime
- Download detailed task completion or failure reports
- Customise the tool for different teams
