

**LEDGER**

## Bennu Ledger is our scalable transaction management and processing tool.

Designed to scale with your business, Ledger ensures you always have a complete picture of your customers' transaction history.

- Support your business in its growth and seamlessly handle sudden spikes in activity with high-performance, scalable transaction processing.
- Provide customers with the flexibility to hold multiple balances and transfer between them, or convert funds into different currencies.
- Summarise and aggregate transaction histories, trends and insights with comprehensive reporting features.
- Ledger can be combined with other Bennu products or run alongside your existing systems.

### KEY FEATURES

- Supports multiple currencies including FX conversion
- Fully customisable search capabilities
- Realtime balance and summary updates
- Flexible integration with transactions from other systems or services
- Advance transaction tracking with notifications on key events
