

ASSURANCE

B ASSURANCE

Bennu Assurance is an identity verification tool that gives you the full picture of your customer's digital identity.

Gather valuable insights and identify potentially fraudulent activity for an added level of protection.

- Run detailed Know Your Customer (KYC) checks with data comparisons carried out by our trusted partners.
- Verify your customer's identity based on device, operating system, location and more.
- Screen customer activity to detect suspicious actions.
- Streamline the customer identification process with automatic document verification.
- Assurance can be combined with other Bennu products or integrated with your existing systems.
